Can I change the administrative password for our account?

Last Modified on 10/01/2024 12:36 pm GMT

When your firm subscribes to Synaptic Research you will be given an administrative user account for modifying your firm's details. We recommend that you change the password on this account as soon as possible.

You simply log in as the administrator, and then follow the instructions for changing your password. You may also want to create user accounts for other people at this stage.
