

How do I filter on statistics within Product research?

Last Modified on 10/01/2024 12:36 pm GMT

The **Stats** tab lists a variety of statistics about contracts: financial strength, investment flexibility in terms of linked funds and sectors, plus own-charge and premium information about contracts (depending on the type of product). Examples of the latter include projected maturity and surrender values.

For each field you can enter a value, and choose whether to filter on equal to that exact value (=), at least that value (>=), or at most that value (<=).

In the example illustrated by the first screenshot below the list is being filtered so that it only includes contracts with an AKG financial strength rating of at least 4.

Investment Bond, Unit Linked

Filtering: 11 contracts out of 20 (55%) - 0 manually excluded

Company	Contract	AKG Unit Linked Business
Aviva Life & Pensions UK Limited	Select Investment Growth & Income Option	5
AXA Wealth	Investment Bond (Adviser Charging)	5
Canada Life	CanInvest Select Account	4
Legal & General	Select Portfolio Bond	5
Prudential Intermediary Division	Prudence Inheritance Bond	5
Prudential Intermediary Division	Prudential Investment Plan (PIP)	5
Scottish Widows	Investment Bond - Initial charge option	4
Scottish Widows	Investment Bond - Withdrawal charge option	4
Standard Life Assurance Ltd	Onshore Bond (Wrap)	5
Standard Life Assurance Ltd	Tailored Investment Bond	5
Sterling Assurance	Sterling Investment Bond	5

When performing research into some products (mostly price-led contracts such as term assurance, CIC etc.), Synaptic provides the valuable option of retrieving live quotations so that you can perform research using features AND pricing at the same time. The data items are added to the grid, but they are also shown on the Stats tab, so that filtering can be applied.

Term Assurance, Level

Filtering: 33 contracts out of 41 (80%) - 0 manually excluded
