## Can I share my research?

Last Modified on 10/01/2024 12:36 pm GMT

This article explains how to share research with other named users within your licence.

Any research that has been produced within Synaptic Research can be shared with other named users within your licence. The benefit of this is that if any of your colleagues are doing a piece of research similar to a piece of shared research they can import the filtering criteria and any manually excluded products.

From within a piece of research, on the Menu Bar, there is a button called **Not Shared**:

Click onto this button and it will change to **Shared**:

🗭 Ranking 🗭 Report 🖡 Quote | Comparison | Change title | Save as PDF | Delete | Copy | Send | Shared | Help

This means that other will now be able to see this research. When viewing this research in the **Recent** tab, the research will have an icon showing against it:

Choose a product type		User list	File check   P	Preset
Nome Pension asvings Pension income Life Health Investment Pin	whene Offishore [Recent]			
ind by client name: Rind Find by title: Rind	Show recent			
For information on coloured backgrounds and icons <b>click here.</b> Research	Client	Last viewed	Actions	^
🗖 🖆 Personal Pension (Fully Insured)	David Smit	h Today	Copy	
Fund data: Pension funds	(none)	15/03/2011	Copy	
Critical Illness: Term	Scott Fry	15/03/2011	Copy	
Personal Pension (Fully Insured)	Lee Childs	14/03/2011	Copy	
Personal Pension (Fully Insured)	(none)	14/03/2011	Copy	
Critical Illness: Term	Lee Childs	14/03/2011	Copy	
🗇 🥌 Lee Childs: Personal Pension (Fully Insured) £200pm and £60K single	Lee Childs	14/03/2011	Copy	
			-	

Magnified this icon looks like this:

📃 🖄 Personal Pension (Fully Insured)

Now that this research has been shared, others will be able to import the criteria used in the research.

After a new piece of research has been started, use the **Import Filter** button to import the criteria from a piece of shared research:

Find the piece of research and click the radio button to the left of the research name.

Now confirm what needs to be imported - Filtering, Excluded contracts, Grid fields.

Once done, click **Do import**. Once this has been done, the criteria used in the shared piece of research will be recorded on this new piece of research.
