Can I display factsheets from the data grid?

The data grid provides quick access to factsheets about companies and individual contracts:

- Click on a company name in the grid for a company factsheet.
- Click on a contract name for a contract factsheet.

In addition, you can right-click on the name of a contract. This provides three further pieces of information about the contract:

- A list of the linked funds which are available (also available as an option from the contract factsheet).
- A fund picker, for choosing the best funds in each sector on the contract.
- General notes about the contract (these are also included in the contract factsheet).
