

Why do I get connectivity errors when trying to access Webline abroad?

Last Modified on 08/05/2024 9:39 am BST

Access to Webline is limited to certain countries only due to security reasons. We assess the global access gateway settings regularly and configure access from countries after they have been assessed to adhere to the security guidelines. You can send access requests to our Application Support Team if needed, through the 'contact us' option.
