

Commission Settings

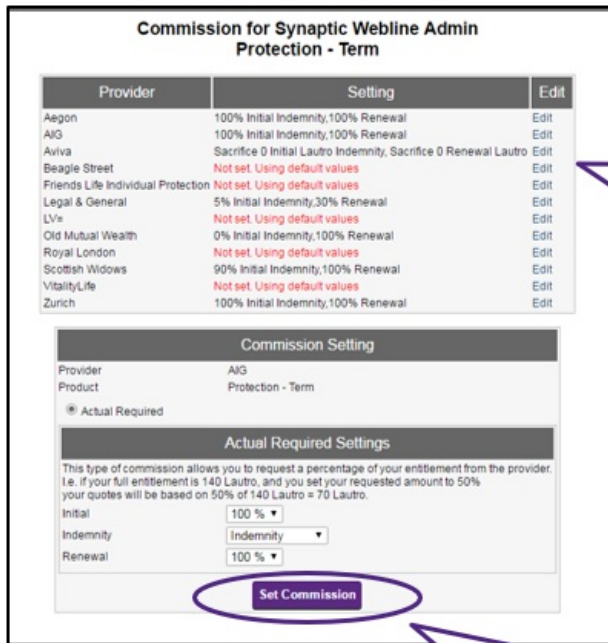

Last Modified on 08/05/2024 9:39 am BST

Within **Commission Settings**, select the product type which will display list of providers.

Weblene gives you the facility to set the value of commission you would like from each product provider for the product type.

Each quote of that type will then be based on the commission style you have set for your company rather than the provider's default

Edit the commission for the relevant provider and you will have the option to set the commission sacrifice requirements.

Please note these options will vary depending on the provider.
