

# Compliance Text

Last Modified on 04/02/2025 12:01 pm GMT

This is used if you are displaying our quote service on a consumer facing website and will display your compliance text to the consumer when they are obtaining a quote.

Select **Compliance Text** and the product category.

# Compliance Help

## Compliance Text

Weblines allows the IFA to define a block of text that will be displayed at the bottom of any pages that are called into the IFAs web site or separate window. This text area is primarily for compliance reasons. The IFA may define the text as required for compliance reasons.

When you first register with Weblines, no compliance text will be displayed at the bottom of any pages created by Weblines. It is the IFAs responsibility to define this text in order to comply with any regulating authorities or their own compliance departments.

The compliance text is set for each product type (i.e. Protection, Bonds, etc.)

To view your current compliance text, click on the product type in the menu below. You may edit the text and click update to change the text that will be displayed on the web pages.

**NOTE: Synaptic Software Limited does not take responsibility for any compliance issues that may arise from its inclusion in any third party web sites. It is the IFAs/Brokers responsibility to check that the generated pages comply with the proper regulating bodies/authorities.**
